## **INTRODUCTION:**

**Naruto Legend is built based on the inspiration from the anime "Naruto".**

**The game is a Play to Earn NFT, built on the Binance Smart Chain platform. Player-owned NFTs issued to the ERC-721 standard can be exchanged on the Naruto Legend marketplace.**

## **Vision**

**Our vision is to create a gaming environment that is both entertaining and earn money. Becoming a long-term project. Users join the blockchain-based game world easily. Help people increase blockchain usage technology to life.**

# Mission

**Our mission is to build a Play To Earn system to meet the investment needs of gamers from all over the world. Create fun and exciting, profitable gaming. We will always create attractiveness for the project to develop in the long term. We believe our system will satisfy and attract investors in the blockchain world.**

## GAMEPLAY

**You need to buy character cards**

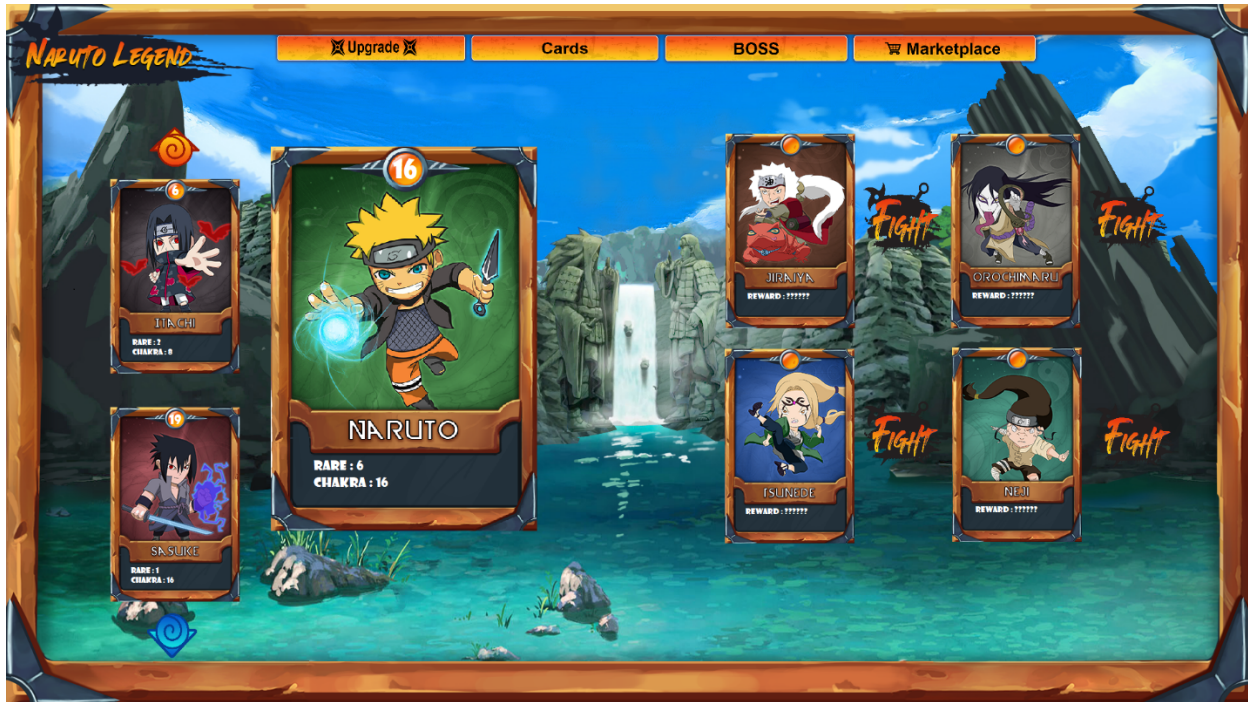

**You can level up your cards.**

**Demo :**

Each card will have 16 Chakra, 2 Chakra equivalent to 1 hit. Every day at 6 am, all Chakra will be recovered. You need to hit every day to receive token rewards
